Isaac Okwuzi

Product Designer + AI assisted coder

About me

My design philosophy is simple: show users you care about them through obsessive attention to detail. By perfecting the little interactions others might miss, your users place a trust in you that carries on to even bigger features.

My expertise spans across Fintech, and Communication interface designs, but I am not constrained to these sectors only. I am always looking for new problems to solve, and coming up with new ways to optimize old solutions for efficiency.

Experience

UI/UX DESIGNER • FREELANCE
11/24-NOW REMOTE

Solving design problems for both individual and business clients. My primary role involves simplifying overly complex interfaces by stripping them to their essential components, reducing information overload and simplifying the overall user experience.

DESIGN COACH • THRIVE NEST
01/24-NOW F.C.T, ABUJA

Tasked with building a curriculum to teach the basics of product design to individuals starting out in the field. I implemented a peer learning system, and a practical first approach to class work. This means that every now and then I'm also able to get a refresher on core design principles.

FOUNDING MEMBER • SIMPL TECHNOLOGIES
03/24-NOW REMOTE

I handle all aspects of user interface & experience design, user outreach, documentations analysis for technical deep dives with the team, and generally making sure the finished product doesn't stray from the original mission.

Education

UNIVERSITY OF BENIN
BSc. Computer Science
2018-2022 • Benin City, Edo

Skills

TECHNICAL
HTML/CSS, Git, Figma, AI-Assisted Coding, & Agile Methodologies.

DESIGN
Interaction Design, Visual Design, Prototyping, Accessibility Design, Wireframing, Usability Testing, Product thinking.
